TURBO VADO S IGH

Smoke / Black Reflective

Consider Vado your high-performance transportation bike, getting you where you're going with an unmatched combination of speed, reliability, and confidence. Whether you load it up with your stuff, or jump on and go, commute to work, or ride to the gym, Vado's full power and huge range will get you from 'point A' to 'point B' ASAP.

- Turbo Full Power 2.2 S motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The enviolo AUTOMATiQ Internal Gear Hub (IGH) stepless shifting technology automatically shifts gears based on a rider's pedal pace, taking changes in the surroundings into account. By selecting a preferred cadence or pedal pace, it allows riders to "set it and forget it", adding an extra layer of safety and comfort for riders.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. MasterMind will give riders a visual, audible, and haptic alert of an approaching vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.

TURBO VADO S IGH STEP-THROUGH

Smoke / Black Reflective

Consider Vado your high-performance transportation bike, getting you where you're going with an unmatched combination of speed, reliability, and confidence. Whether you load it up with your stuff, or jump on and go, commute to work, or ride to the gym, Vado's full power and huge range will get you from 'point A' to 'point B' ASAP.

- Turbo Full Power 2.2 S motor and 710Wh battery offer an unparalleled riding experience, providing a smooth, seamless, and shockingly quiet amplification of your efforts, up to 28 mph. The integrated controller responds to your pedal inputs resulting in intuitive amplification of your efforts with an incredibly natural feel.
- MasterMind and Mission Control The MasterMind display reveals all relevant info about your ride, allows real-time tuning of support levels, and enables over-the-air updates so that your bike gets better over time. MasterMind seamlessly integrates with the Mission Control app for range optimization tools, advanced tuning, on-ride diagnostics, and more.
- The enviolo AUTOMATiQ Internal Gear Hub (IGH) stepless shifting technology automatically shifts gears based on a rider's pedal pace, taking changes in the surroundings into account. By selecting a preferred cadence or pedal pace, it allows riders to "set it and forget it", adding an extra layer of safety and comfort for riders.
- Proven Smooth Efficiency We designed a custom testing mechanism to analyze bumps at even the smallest frequency to increase comfort and vision. That precision, paired with a suspended seatpost, higher volume tires, and an 80 mm suspension fork, will flatten roads before your eyes.
- Turbo System Lock Use the Mission Control app to disable your bike's motor and activate the motion sensor alarm. Once locked, the motor cannot be enabled again except by the owner.
- Garmin Radar An integrated Garmin Radar sensor lets you know when traffic is coming up behind you. Garmin's Radar technology can detect cars up to 140 meters away. MasterMind will give riders a visual, audible, and haptic alert of an approaching vehicle's relative distance and rate of speed.
- Fully Integrated Removable and Lockable Downtube Battery Easy to charge, easy to secure.
- Equipped with DRYTECH Fenders, LED front and rear lights, and 27kg capacity rear HD Rack. The rear rack is compatible with child bike seats, and the bike is also rated to pull a thru-axle trailer.
